

REVOLUTIONISING THE POWER SECTOR IN INDIA!

RICH LEGACY INSPIRING EXCELLENCE

After Six decades of establishing its leadership in the aluminium sector the group is now a name to reckon with in the power sector. JSK is an INR 30 Billion company, has facilities at Silvassa, manufacturing 1,08,408 MT. JSK is a well diversified, technology driven and professionally managed organization and ranks amongst the largest aluminium Conductor manufacturing companies in the World. JSK is known for initiating new processes, products and materials.

JSK product range includes EC Grade Aluminium Wire Rods, Aluminium Alloy wire Rods, Like 1120, 3003, 3102, 5052, 5054, 6061, 6101, 6201 (M temper & T-4 online solutionized), 6063, 8176, AlZr, AL59, AL7 etc., AAC, ACSR, AACSR, AAAC, ACAR, AL59 Conductors including AL59 ECO & ECO Max Conductors and All Types of High Temperature Low Sag (HTLS) Conductors, i.e TACSR, ACSS, GZTACSR (Gap Type), STACIR & ACCC etc.

JSK is an approved vendor in all Utilities, Electricity Boards, Including PGCIL and EPC contractors. JSK is one of the largest exporters to Africa, Middle East, South East Asia, South American Markets and USA. We are recognized by the Government of INDIA as Authorized Economic Operator.

OUR STRENGTH

- Over Six decades of experience in the Aluminium sector.
- More than 500+ satisfied customers With substantial resources and keep strategic vision, we acquire top suppliers at optimal prices.
- Experienced and technically sound professionals.
- Assigned as "A Grade" rating by Credit Rating Agency (ICRA)
- We are London Metal Exchange listed with London Metal Exchange as tester of primary Aluminium.
- Approved supplier for Latin American Market Certified by RETIE.
- State-of-the-art, well equipped, fully integrated conductor manufacturing facility coupled with continuous casting and rolling plant for Wire Rods.
- Our testing lab is accredited by the National Accreditation Board (NABL) in accordance with ISO/IEC-17025.
- Production systems are geared to meet customer's deadlines.
- Highly skilled, well trained, Experienced and qualified work force.
- Modern technology utilisation leading to quality production.

DRIVEN BY VALUES. NUTURED BY PASSION

Vision

To lead the energy sector by providing cutting-edge, reliable, and sustainable solutions that power the world's infrastructure, foster technological advancement, and contribute to a cleaner, more connected future.

Values

Harnessing and using our learnings to drive continuous improvement, value addition, and all-round corporate social responsibility while maintaining our core values.

(ISO 9001:2015, ISO 14001:2015 & OHSAS 18001:2007 Certified Company)

OUR HPC PRODUCTS

Aluminium Alloy Wire

AL 59 Conductor

All aluminium conductor with special aluminium alloy provides all mechanical and electrical properties equivalent to ACSR and AAAC respectively. Best suited for enhancing the existing line capacity where additional power corridors are not feasible.

PRO's:

- Up to 30% less I²R losses for same sized conductor
- For same output runs cooler by 5-10°C, hence lower carbon emissions

APPLICATION :

Suitable for new lines

SELECTON OF SUITABLE TECHNOLOGY FOR HTLS CONDUCTORS

High Power Transfer Capacity/CCC

Best Material and Construction

Power Loss and Project Cost

MEET THE
TARGET LOAD

LESS
MAINTENANCE

EASY
INSTALLATION

OPTIMISED
OPEX & CAPEX

OUR HTLS PRODUCTS

STACIR - Super Thermal Aluminium Conductor Invar Reinforced

This low sag conductor is manufactured from Al-Zr (Aluminium Zirconium) alloy rods. The conductor comprises of a strong inner Invar steel core and concentrically arranged STAL strands forming the outer layer of conductors.

PRO's:

- No modification/reinforcement is required to the existing towers.
- 100% more - Power Transfer Capacity

APPLICATION :

Suitable for Re-conductoring

ACCC - Aluminium Conductor Composite Core

Aluminium Conductor Composite Core (ACCC[®]) consists of hybrid carbon and glass fiber composite core which is wrapped with trapezoidal shaped Aluminium strands.

PRO's:

- 40% Reduction in Line Loss.
- Low Weight and Low SAG.

APPLICATION:

Suitable for Reconductoring, Renewable, Newlines.

ACSS - Aluminium Conductor Steel Supported

ACSS conductors are manufactured from Annealed Aluminium 1350 wires and an inner high tensile strength core of Galfan (Zn 5% Al Mischmetal) coated / Galvanized steel wires.

PRO's:

- Capable of operating at upto 200 & 250° C.
- Low Loss due to Annealing of Aluminium

APPLICATION :

Mostly suitable for New Lines

TACSR Conductor

TACSR conductors are the conductors wherein the inner core is composed of galvanised steel and outer layers are composed of thermal-resistant aluminium alloy.

PRO's:

- 50% more - Power Transfer Capacity.

APPLICATION :

New line solution for different Kv lines

GAP- Type Conductor

GAP conductors are manufactured from (super) thermal-resistant Aluminium Alloy wire and high strength steel core. There is a small annular gap filled with grease between the high-strength steel core and the first layer of trapezoidal-shaped aluminum strands.

PRO's:

- Low Sag

APPLICATION :

Suitable for Re-conductoring

CUTTING-EDGE PRODUCTS

ROD:

Wire Rod-EC Grades I Wire Rod-Alloy, Like 1120, 3003, 3102, 5052, 5054, 6061, 6101, 6201 (M temper & T-4 online solutionized), 6063, 8176, AlZr, AL59, AL7 etc. I Wire Rod- Deoxy up to 22.00 mm Diameter.

CONDUCTOR:

AAC, ACSR, ACSR/AW, AACSR, AAAC, ACAR and all type of HTLS Conductors i.e TACSR, ACSS, GZTACSR (Gap Type), STACIR & ACCC etc. up to 127 Strands.

TURN KEY ENGINEERING

"Total turnkey solution provider" - with a highly experienced team of professionals with state of the art equipment. JSK aims at providing one stop solution for all T&D related issues ranging from reconductoring of old lines with HTLS conductors to building new lines with HTLS/conventional conductors. Providing quality and optimised power through OHE in T&D, cable laying, sub-stations, railway electrification with end to end support of optimization and engineering are core strengths of the team at JSK.

RAILWAY ELECTRIFICATION

From our modern and hi-tech facility built in Silvassa (near Mumbai), we are supplying copper Catenary wire and contact wire, The quality of the product is as per RDSO and other international standards. Capacity is built to deliver upto 50,000.00 MT of the product mix. With highly skilled experienced and technically qualified team, we are delivering the best quality product.
